Professional Summary

Python Developer with experience building AI-powered platforms, Flask web applications, desktop tools, and cloud solutions. Delivered production systems used daily by 500+ users. Skilled in Python, Flask, AWS, REST APIs, and Google AI integrations. Passionate about automating workflows and building practical tools for real communities.

Experience

Software Developer

Feb 2026 – May 2026

Gyan Sarovar, Brahma Kumaris World Spiritual University, Mount Abu, Rajasthan

- Developed BK-MIX Stream Manager, a multilingual live-streaming platform supporting global spiritual broadcasts across multiple simultaneous language channels using Node.js, React, Electron, WebSockets, and FFmpeg.
- Designed real-time monitoring, audio routing, overlay management, and automated fault-recovery features reducing manual intervention.
- Collaborated with senior developers on architecture, deployment, and implementation of core platform functionality.

AWS Trainee

Jul 2025 – Sep 2025

Lykops (during final year of MCA)

- Built Streamlit applications using Python and Boto3 for AWS S3 management (upload, download, listing, deletion) with pre-signed URLs for secure temporary file access.
- Developed a multi-image photo gallery uploader on Amazon S3 with robust error handling.

Projects

MurliQuiz – AI-Powered Daily Quiz Platform

Python, Flask, Gemini AI, Google Forms API, Drive API

- Built a full-stack platform that auto-fetches daily Murli teachings, generates multilingual quizzes via Gemini AI, and publishes to Google Forms with answer keys and per-question explanations.
- Delivers quizzes daily to 500+ spiritual community members across English, Hindi, and Kannada with automated scoring.
- Supports 5–25 configurable questions with mixed difficulty (Easy/Medium/Hard) and difficulty-based point scoring.

CertGen – Desktop Certificate Management System

Python, Flask, PyWebView, SQLite, ReportLab

- Built a PyWebView desktop app for non-technical school staff to generate 6 types of official certificates including Karnataka government format Transfer Certificate (33 fields) as print-ready PDFs.
- Automated institution branding (logo, signature, seal) and certificate history – eliminating manual creation entirely.
- Supports multi-organization profiles and inline PDF preview before download.

BK-MIX Stream Manager

Node.js, React, Electron, WebSockets, FFmpeg

- Multilingual live-streaming desktop platform managing simultaneous broadcasts with independent language-specific audio channels and centralized video processing.
- Implemented real-time stream monitoring, overlay management, and automated fault recovery for uninterrupted global broadcasts.

Technical Skills

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Flask, Django, Streamlit, Boto3, ReportLab, PyWebView, Pillow, React, Node.js

Cloud & AWS: S3, Lambda, SNS, DynamoDB, IAM **Databases:** SQLite, MySQL

APIs & Integration: REST APIs, Google Forms API, Google Drive API, Gemini AI API, OAuth 2.0

Tools: Git, GitHub, VS Code, Power BI, Excel

Education

Master of Computer Applications (MCA)

Dec 2025 | CGPA: 7.80

Basaveshwar Engineering College

Bachelor of Computer Applications (BCA)

Nov 2023

STC Arts and Commerce College, Banahatti

Certifications

SQL (Basic) – HackerRank (Jan 2026) | SQL (Intermediate) – HackerRank (Apr 2026) | AWS Cloud Practitioner – Udemy (Sep 2025)
